STREAMIX

Streamix

Next-Generation Video Streaming Platform

BUSINESS DOCUMENT
Version 1.0 · June 10, 2026

Table of Contents

1. Executive Summary

Streamix is a cloud-native video streaming platform built to deliver cinema-quality entertainment — movies, TV series, live sports, and documentary content — to subscribers globally. The platform combines adaptive HLS streaming, real-time transcoding, personalized recommendations, and multi-profile household management under a tiered subscription model.

- Multi-bitrate adaptive streaming (360p → 4K) powered by a dedicated Go transcoding service.
- Clean, responsive Next.js 15 web application with a mobile-first design philosophy.
- Scalable .NET Core 8 backend following Clean Architecture with CQRS via MediatR.
- PostgreSQL full-text search with pg_trgm fuzzy matching for instant content discovery.
- Four subscription tiers (Free → Premium) designed to maximize average revenue per user.
- Designed for horizontal scalability: each service is independently containerized.

2. Company & Vision

Mission Statement

To make premium entertainment accessible to every screen — delivering fast, reliable, beautifully presented video to subscribers regardless of device, bandwidth, or geography.

Core Values

- Quality — every stream is adaptive, never buffering.
- Accessibility — content available across all devices and connection speeds.
- Personalization — intelligent recommendations powered by watch history.
- Transparency — clear pricing, no hidden fees.
- Privacy — user data is never sold to third parties.

Long-Term Vision

Within five years, Streamix aims to become the leading independent streaming platform in its target markets, expanding from web-only to native iOS/Android apps, smart TV SDKs, and adding original content production as a differentiator.

3. Market Opportunity

Global Streaming Market

The global video streaming market was valued at USD 544 billion in 2023 and is forecast to grow at a CAGR of 21.5% through 2030, driven by rising internet penetration, proliferation of connected devices, and the ongoing shift from traditional broadcast to on-demand consumption.

Segment	2023 Value	2028 Forecast	CAGR
SVOD (Subscription)	$100B	$190B	13.7%
AVOD (Ad-supported)	$50B	$130B	21.1%
Live Streaming	$70B	$185B	21.5%
Total OTT	$220B	$505B	18.1%

Source: Industry estimates, 2024.

Addressable Market

- Total Addressable Market (TAM): USD 220B global OTT video market (2023).
- Serviceable Addressable Market (SAM): USD 42B — English & MENA-language SVOD.
- Serviceable Obtainable Market (SOM): USD 210M — achievable in 36 months at 0.5% SAM share.

Tailwinds

- Over 5.4 billion internet users globally, growing by 150M per year.
- Smart TV penetration exceeds 60% of households in target markets.
- Mobile data costs falling 15% annually in emerging markets.
- Cord-cutting accelerating: cable TV household share dropped from 83% (2014) to 51% (2024).
- COVID-19 permanently elevated streaming consumption habits in 18–45 age cohort.

4. Product Overview

Streamix delivers video content through a web application and API-first platform that allows rapid extension to native mobile and TV applications. The product experience is designed around three pillars: discovery, playback quality, and personalization.

Core Features

Browse & Discover	Curated rows by genre, trending, new releases, and editor picks. Full-text fuzzy search across title and description.
Adaptive Streaming	HLS multi-bitrate playback (360p / 720p / 1080p / 4K). Player auto-selects quality based on bandwidth; manual override available.
Live Streaming	Live sports, events, and TV channels with low-latency HLS delivery. Live badge, real-time viewer count, upcoming schedule.
Multi-Profile	Up to 5 profiles per account with independent watch history, recommendations, and optional PIN protection.
Watch Progress	Resume exactly where you left off across any device. Continue Watching row auto-populated.
Watchlist	Add/remove titles with optimistic UI. Accessible from any profile.
Subtitles & CC	WebVTT subtitle tracks selectable per-play. Auto-converted from SRT on upload.
Search	Instant fuzzy search with pg_trgm similarity + PostgreSQL full-text vectors. Filter by type, genre, and release year.
Subscription Mgmt	Self-service tier upgrades/downgrades, billing history, and cancellation with a 30-day notice period.
Admin Dashboard	Content upload (presigned MinIO URLs), transcode status monitoring, channel management, live event scheduling.

5. Target Audience

Primary Segments

Segment	Age	Behaviour	Primary Device
Young Adults	18–34	Heavy binge-watchers; mobile-first; price-sensitive	Smartphone / Laptop
Families	28–45	Multi-profile; value Kids Mode; weekend viewing	Smart TV
Sports Fans	22–50	Live-event driven; high churn risk if no live rights	Smart TV / Mobile
Cinephiles	25–55	Quality over quantity; independent & arthouse content	Laptop / Tablet

Geographic Focus

- Phase 1 (Year 1): English-language markets — US, UK, Canada, Australia.
- Phase 2 (Year 2): MENA Arabic-language markets — UAE, Saudi Arabia, Egypt.
- Phase 3 (Year 3): Localisation for South & Southeast Asia.

6. Subscription & Revenue Model

Tier Structure

Tier	Price / Month	Streams	Max Quality	Ads	Downloads
Free	USD 0	1	720p	Yes	No
Basic	USD 7.99	1	1080p	No	No
Standard	USD 13.99	2	1080p	No	Yes (2 titles)
Premium	USD 19.99	4	4K HDR	No	Yes (unlimited)

Revenue Streams

- Subscription Revenue (SVOD): Primary revenue — recurring monthly fees.
- Advertising (AVOD): Banner and pre-roll ads served to Free tier users via third-party ad network.
- Pay-Per-View (PPV): Premium live events (boxing, concerts) available as one-time purchases.
- B2B Licensing: API access for airlines, hotels, and corporate wellness platforms.

Unit Economics (Target, Year 2)

ARPU (blended)	USD 11.40 / month
Customer Acquisition Cost	USD 8.50
LTV (24-month avg.)	USD 274
LTV / CAC Ratio	32× (target: >3×)
Gross Margin (streaming)	~72%
Monthly Churn Target	<2.8%

7. Competitive Landscape

Platform	Strengths	Weaknesses	Our Advantage
Netflix	Massive content library, global brand, strong recommendation engine	High subscription cost; no free tier; password sharing crackdown	Free tier; lower price point; live sports
Disney+	Franchise content (Marvel, Star Wars, Pixar); family focus	Limited adult content; minimal live sports	Broader genre coverage; live events
Amazon Prime	Bundled with Prime; strong originals	Complex UI; content mixed with rentals	Cleaner UX; transparent pricing
YouTube	Free; massive user-generated content	Low premium content quality; ad-heavy	Professional content; no UGC noise
Streamix	Adaptive streaming tech; live + VOD; free tier	Smaller content library at launch	—

Differentiation Strategy

- Technical superiority: In-house Go streaming service enables lower latency and cost than third-party CDNs.
- Live + VOD hybrid: Most SVOD platforms lack integrated live event infrastructure.
- Free tier as acquisition funnel: Drives top-of-funnel growth without paid marketing.
- Developer-first API: B2B licensing opens revenue from enterprise partners.

8. Go-to-Market Strategy

Launch Phases

Phase 1 — Beta (Month 1–3)	Invite-only access to 5,000 beta users. Collect NPS feedback. Fix critical UX issues. Seed content library with 200+ licensed titles.
Phase 2 — Soft Launch (Month 4–6)	Open registration. Free tier open to all. Paid tiers launched. Target 50,000 registered users, 8,000 paid subscribers.
Phase 3 — Growth (Month 7–18)	Performance marketing campaigns (Google, Meta, TikTok). Referral program (30-day free Premium). Influencer / creator partnerships. Target 500,000 registered users, 80,000 paid subscribers.
Phase 4 — Expansion (Month 19–36)	Launch iOS & Android native apps. Enter MENA market. Secure live sports rights for regional leagues.

Customer Acquisition Channels

- SEO / Content marketing — streaming guides, genre landing pages.
- Social media advertising — short-form video clips as ads (TikTok, Instagram Reels).
- Referral program — both referrer and referred receive 1 month free Standard.
- Partnerships — ISP bundle deals; smart TV manufacturer pre-installs.
- App Store Optimisation (post mobile launch).

9. Technology & Operations

Technology Stack Summary

Frontend	Next.js 15, React 18, TypeScript 5, TailwindCSS, HLS.js, TanStack Query, Zustand
Backend API	.NET Core 8, ASP.NET Core, MediatR, FluentValidation, AutoMapper, EF Core 8
Streaming Service	Go 1.24, Chi router, FFmpeg (multi-bitrate HLS), MinIO SDK, go-redis
Database	PostgreSQL 16 with pg_trgm + tsvector full-text search
Cache	Redis 7 — API response cache, refresh tokens, session data
Object Storage	MinIO (S3-compatible) — raw video, HLS segments, thumbnails, subtitles
Infrastructure	Docker, Docker Compose; production: Kubernetes with horizontal pod autoscaling
CDN (production)	CloudFront / Cloudflare for HLS segment delivery at the edge
Auth	JWT (HS256, 15-min access + 7-day refresh), NextAuth.js v5
Monitoring	Serilog + Seq, health check endpoints, Prometheus + Grafana

Content Operations

- Content ingest: Admin uploads raw video via presigned MinIO URL (no size limit).
- Transcoding SLA: 360p/720p/1080p variants ready within 30 minutes of upload.
- Quality assurance: Automated playback smoke test after transcoding confirms segments play.
- Subtitles: Uploaded as SRT; auto-converted to WebVTT by the Go service.
- Metadata: Managed via Admin API (title, description, genres, release year, maturity rating).

10. Risk & Mitigation

Risk	Likelihood	Impact	Mitigation
Content licensing costs exceed projections	Medium	High	Start with public domain + Creative Commons content; license incrementally as revenue grows.
Infrastructure costs at scale	Medium	Medium	CDN for HLS delivery (cost per GB declines at volume); auto-scaling to match demand.
Churn due to thin content library	High (early)	High	Free tier retains users; focus on live sports/events as sticky content.
Competitor price war	Low	Medium	Cost leadership via in-house streaming stack; diversify into B2B licensing.
DRM / piracy	Medium	Medium	Integrate Widevine / FairPlay DRM in Phase 2; short-lived signed streaming tokens now.
Regulatory / geo-blocking	Low	Low	Geo-filtering by IP; legal review per market before expansion.
Cybersecurity breach	Low	High	bcrypt password hashing; JWT short expiry; Redis token rotation; regular pen tests.

11. Financial Projections

The following projections are illustrative estimates based on comparable SVOD platforms at similar stages of growth. Actuals will vary with content licensing spend, marketing efficiency, and geographic mix.

Metric	Year 1	Year 2	Year 3
Registered Users	100,000	500,000	2,000,000
Paid Subscribers	15,000	80,000	350,000
ARPU (USD/month)	$9.20	$11.40	$12.80
Monthly Recurring Rev.	$138K	$912K	$4.48M
Annual Revenue	$1.65M	$10.9M	$53.8M
Content Licensing Cost	$0.6M	$3.2M	$14.0M
Infrastructure Cost	$0.3M	$1.1M	$3.8M
Gross Profit	$0.75M	$6.6M	$36.0M
Gross Margin	45%	61%	67%

All figures in USD. Projections exclude capital expenditure.

12. Roadmap

Quarter	Milestone
Q1 2025	MVP launch: web app, VOD, 4 subscription tiers, 200 titles
Q2 2025	Live streaming: sports events, TV channels
Q3 2025	iOS & Android native apps (React Native)
Q4 2025	Widevine / FairPlay DRM integration; offline downloads
Q1 2026	MENA market launch; Arabic UI & subtitles
Q2 2026	Smart TV apps (Samsung Tizen, LG webOS)
Q3 2026	Recommendation engine (collaborative filtering)
Q4 2026	Original content production — first 3 exclusive titles
2027	Series A fundraising; expand to South & Southeast Asia

— End of Document —
